test.1 A sample assertion Class E

Statement. For $x \in \mathbb{R}$, the integral is well defined.
Source. A bibliography test follows (Knuth, 1984).

Proposition 1.1 ([proved here])**.** *For $a, b \in \mathbb{R}$, $(a+b)^2 = a^2+2ab+b^2$.*

Proof. Expand the product and commute a with b.

$$\int_0^1 x^2\,dx = \frac{1}{3}, \qquad \mathfrak{g} = \bigoplus_{i\geq 1} \mathbb{C} e_i, \qquad \mathcal{L} = \partial_x^2 + u.$$
